

The IQ Battery

It shines when the sun sets

Store solar power to use anytime—at night or during peak hours to reduce energy bills or when there’s an outage and utility power is unavailable. Enphase batteries are modular and come in two sizes and two capacities to perfectly suit your energy needs today and in the future.

Designed for maximum safety.

By using lithium iron phosphate battery chemistry, Enphase puts safety first where it matters most—your home. Enphase IQ battery operates at low-voltage DC power, avoiding the dangers that come with high-voltage DC power.

Smart backup with or without the grid.

In the event of a grid outage, our Power Start™ technology can intelligently provide enough surge power to smoothly start power-hungry appliances.

Perfect size, perfect fit.

IQ Batteries come in two capacities to provide the most flexibility when designing your storage needs—and each are available in two sizes to fit any space.

Reliable power you can use anytime.

Enphase batteries use multiple IQ8 microinverters—the same as used in our solar products—so your power keeps flowing.

IQ BATTERY 10
10 kWh CAPACITY
42.1"W x 26.2"H x 12.6"D

IQ BATTERY 3
3.36 kWh CAPACITY
14.5"W x 26.2"H x 12.6"D

IQ BATTERY 10T
10 kWh CAPACITY
50.5"W x 30.5"H x 7.4"D

IQ BATTERY 3T
3.36 kWh CAPACITY
16.9"W x 30.5"H x 7.4"D
